Dear Dr. Viji,

Thank you for your mail. I think I did not make myself clear. We are going to get registered with We Serve. We also wanted to partner in your effort and help youth through your volunteers by supporting the youth recommended by them. This requires your help to position our work suitably so that when your volunteers want to help a youth they have the details about us and are in a position to contact us.

We will be registering immediately. Our own mission to help 1 million youth and we have started partnering with other NGOs' across the country and replicating Unnati. As on date we have started 7 centres.

We wanted your support to facilitate E- Learning which could help scaling up of this program. Please keep this in mind or place it as a requirement of an organisation registered with you. We will be sending you an invite to join our google groups and would request you to accept the same.

Respected Dr. Viji,

Thank you for the kind words. I shall surely convey your best to my parents. I am indeed pleased I found about this organization and could volunteer in it. I really look forward to do something substantial towards the organization's mission, and hope something akin to my interests comes up soon.

With best regards,

Dear Dr. Viji,

Glad to see your e mail after a long period of silence. I will be a part of your lofty program/organisation. I want to focus on my home town folks in INDIA which I visit almost twice/yr & where there is greatest need & concentrate on other parts of the country if time permits. Please stay in touch.

with best regards.

Dear Viji

I saw your Tele med and Tele education presentation. I like it and I think this will take off for sure. I met Swamiji of Arsha Vidya Gurukulam Swamy Dayananda Saraswati. You may be aware that they are running a non profit organization called Aim for Seva in different states in India. I think they also have some branches in USA . They have projects to teach real poor students especially the Adivasis and tribal people.

I talked to him about ECC and the work that is being done. He is very interested if it will help in the education and decrease the drop out rate. The biggest problem as you already know is to get to these people, they don't even have proper buildings. Currently they are constructing student houses in these places and these students are housed there and different teachers go to teach. Problem is not enough teachers or enough buildings. so our format will go a long way I think.

Waiting to hear from you

Dear Dr M S Viji,

Thank you for introducing me to 'International We Serve Foundation'.

I had an opportunity to meet you in San Francisco on 20th August 2011 during IEEE Award Ceremony where Dr A P J Kalam, our beloved Ex President, received the award. I have seen the website of 'We Serve' and found the cause and concern very genuine. I'll take a little more time to go through the website before making any commitment but I am sure of joining.

Just to introduce myself, I am a B.Tech in Electronics and Communication Engineering from IIT, Roorkee (Formerly University of Roorkee) with an MBA and working with ONGC as Chief Engineer. I am a volunteer with IEEE and has served in various volunteer positions (Section Secretary, Vice Chair and Chair) and presently am a member of IEEE Asia Pacific (Region 10) Executive Committee.

Thanks again for introducing me to 'We Serve'.

Best regards,
Deepak Mathur

Dear Viji Uncle ,

Greetings. Hope you are doing good. I will sign up as a volunteer.

4-20-11 Dear Dr. Viji,

I am both humbled and excited by your email.

First, let me just thank you for all the work you do, truly around the globe, to help those less fortunate. It is both an honor and privilege to work with you.

I met and discussed Part 1 below with my other partners here in our Lexington office. We are excited about such an opportunity for us and our staff to volunteer in such a way to benefit and touch people. Naturally some were a bit nervous concerning just exactly what we would need to do from our standpoint. I think we just need to learn more about what exactly we would be doing (would we need to design an actual course, etc.) Could you provide more specifics as to that?

As for Part 2, I would be honored to serve.
Please let me know how you would prefer to proceed.
Sincerely,

4-20-11 Dear Dr. Viji,

Prince and I really appreciate your emails and updates on your new Foundation. Your goals and visions with "PURA" are such an inspiration to us both. I have visited the website and it is truly an amazing website you already have up and running!

We would be glad and honored to offer our services to PURA in any fashion, including preparing the tax returns, tax consulting, and any other service the Foundation may need at concessional rates.

In addition, please let us know if any member of our team here at Blue & Co, including, but not limited to, myself or Prince, could offer their services as an at-large board member or serve the Foundation in any capacity.

Thank you again for considering us to be involved with such a wonderful Foundation. It is an honor for us.

With warmest regards,
Paul J.

Viji and Sib, Thank you for the quick response. What a great mission for your foundation. I believe our project serving families and children with disabilities in rural India is a strong match for a partnership with WeServe. We would like to find a time to meet and discuss next steps to move forward. I return from Ecuador on a medical brigade on August 9, so we can look for times that work you all of you after that time. I look forward to meeting

Respected Sir/Madam,

I came across your organization's web site. I understand the vision and mission of "We Serve foundation" to serve humanity and hence I would like to approach you with the idea of a project. I am Vijayalakshmi Ravi and I teach Information Technology at College level. Apart from this I have some experience in software development which I try to put in use so that it can benefit the society in some way. I have developed non-profit stand alone projects for educational institutions in the past. I definitely would like to volunteer for education purpose with your organization as well in the future. Currently I have request from some senior citizens to develop a project for them. I would like to develop a project to serve the senior citizens community in India. This project is called "Jyeshta Ayush" or Senior Citizens Wellness management. For this I would like to know if your software can be used for this purpose. If so then please go through my proposal and let me know how can we take this forward.

Viji Ravi

Thank you so much for taking your valuable time to meet with me and share ideas to support the STSG Mayasandra, India project. I will request that the Mayasandra Project join the WeServe Foundation beneficiary list and look into how we might in the future look at a PURA project. Any ideas on assisting us with fundraising in Ky or in India would be greatly appreciated. It was a pleasure to share dinner with such a committed group of volunteers. Tom

7-22-12 Hello Viji,
NICE!! and good testament for all the good work you are promoting. I am sure Dr.Kalam is very proud of you and the team. The virtual classes set up thus far will prove invaluable to the students in India. The seed has been sown and these small successes always lead to bigger and better ones. Good Luck on your endeavor and am proud of you leading it! Thanks for sharing.
