

Promoting Employment Generation

Education and Skill Development: The Foundation volunteers shall use the nodal centers and broadband connectivity linking educational institutes and Virtual knowledge centers, via Tele-Education, to empower the deserving youth and disadvantaged people by learning various vocations,. This will help them find sustained employment and via tele-commuting, cater to the needs of firms outside their geographic locality.

Participants and Volunteers: The Foundation shall work with well-known educational institutes, respected teachers, successful industrialists, business leaders, professionals and entrepreneurs to share their knowledge, teach, guide, mentor and help the poor who belong to the various Beneficiary organizations. By registering as Beneficiary / Direct Member, the poor citizens shall access these talented and eager volunteers and helpers.

Business parks and Rural Service Centers: Through the Foundation volunteers and institutes, the poor shall have the opportunity to learn necessary skills based on their interest, in a number of sectors and industries in order to get employment or set up rural business parks that incubate several entrepreneurial activities.
